★Gli articoli **09/10/11/12/13/14** di Neutra 6.0 presentano colorazioni uniche irripetibili con i tradizionali sistemi di cottura del settore ceramico. Tali colorazioni abbinano alla qualità estetica delle cromie proposte un processo produttivo completamente artigianale dove sfumature e leggere variazioni cromatiche sono da considerare unicità del prodotto. Per esaltare tali caratteristiche nell'uso quotidiano del materiale richiediamo di: - Utilizzare tali articoli solo per rivestire pareti interne. - Proteggere prima della stuccatura i bordi della lastre con apposito nastro protettivo gommato e toglierlo prima che eventuali residui di stucco o silicone asciughino completamente. - In caso di contatto tra residui di stucco epossidico o silicone con le lastre, rimuoverli immediatamente con acqua calda e spugna morbida evitando in qualsiasi caso l'uso di acidi o remover per stucchi epossidici. - Nella manutenzione quotidiana usare preferibilmente acqua, detersivi neutri e spugna morbida evitando alcool, detersivi acidi o basici e detersivi a base di pasta abrasiva. - Per la pulizia di macchie d'olio, è possibile utilizzare prodotti sgrassanti specifici reperibili a banco in tutti i supermercati. - E' sconsigliato l'uso di prodotti a base di silicone acetico per sigillare infissi, docce o sanitari sulla superficie ceramica; utilizzare in alternativa prodotti a natura neutra e mascherare sempre la lastra con nastro adesivo prima della sigillatura.

Neutra 6.0 articles **09/10/11/12/13/14** achieve unrepeatable, unique colours, using traditional firing systems in the ceramics sector. These colourings combine an entirely craftsman production process with the aesthetic quality of the colours offered, where nuances and slight colour variations are to be considered a product feature which is truly unique. To enhance these features in the daily use of this material we kindly request customers to: - Use these items for interior wall cladding only. - Protect the edges of the slabs before grouting with special rubberised protective tape, removing it before any excess stucco or silicone dries completely. - In case of contact between epoxy stucco or silicone residues and the slabs, remove any residue immediately with hot water and a soft sponge, in all cases avoiding the use of acids or epoxy stucco remover. - For daily maintenance use preferably water, neutral detergents and a soft sponge, avoiding alcohol, acid or basic detergents and also detergents with an abrasive paste base. - To clean oil stains you can use specific degreasing products commercially available in most supermarkets. - It is not advisable to use acetic silicone-based products when sealing fixtures, showers or sanitary ware on the ceramic surface; use instead products of a neutral nature and always adequately mask the slab with adhesive tape before sealing.

Les articles **09/10/11/12/13/14** de Neutra 6.0 présentent des colorations uniques impossibles à reproduire avec les systèmes de cuisson traditionnels du secteur céramique. Ces colorations associent à la qualité esthétique des couleurs issues d'un processus de production entièrement artisanal, où les nuances et les légères variations chromatiques font toute la singularité du produit. Pour faire ressortir ces caractéristiques dans l'utilisation quotidienne du matériau: - Utiliser ces articles uniquement en revêtement de murs intérieurs. - Avant l'application du ciment-joint, protéger les bords des dalles avec un ruban de protection caoutchouté, et le retirer avant séchage complet d'éventuels résidus de ciment époxy ou de silicone. - En cas de contact entre des résidus de ciment époxy ou de silicone et les dalles, éliminer ces résidus immédiatement avec de l'eau chaude et une éponge souple; éviter dans tous les cas d'utiliser des acides ou des produits nettoyants pour ciments époxy. - Lors de l'entretien quotidien, utiliser de préférence de l'eau, des nettoyants neutres et une éponge souple; éviter l'alcool, les nettoyants acides ou basiques et les nettoyants à base de pâte abrasive. - Pour nettoyer les taches d'huile, des produits dégraissants spécifiques peuvent être utilisés, vendus dans tous les supermarchés. - Il est déconseillé d'utiliser des produits à base de silicone acétique pour le scellement sur la surface céramique de châssis, douches ou sanitaires; utiliser plutôt des produits neutres et toujours appliquer le ruban adhésif sur la dalle avant l'opération.

Die Artikel **09/10/11/12/13/14** von Neutra 6.0 bieten, mit den herkömmlichen Brennsystemen des Keramiksektors, nicht wiederholbare, einzigartige Farbtöne. Diese Farbgebungen kombinieren die ästhetische Qualität der Farbtöne mit einem vollkommen handwerklichen Verfahren, wo die Nuancierungen und leichten Farbvariationen die Einzigartigkeit des Produkts kennzeichnen. Um diese Eigenschaften im täglichen Materialgebrauch hervorzuheben, empfiehlt der Hersteller: - diese Artikel nur zum Verkleiden von Innenwänden einzusetzen - die Plattenkanten vor deren Spachtelung mit einem Gummischutzband abzudecken und dieses zu entfernen, bevor eventuelle Spachtel - oder Silikonreste komplett trocknen - Im Fall von Berührung von Epoxyspachtelresten oder Silikonresten mit den Platten sollten die Restpartikel unmittelbar mit Warmwasser und einem weichen Schwamm entfernt werden; dabei sind säurehaltige Mittel oder Remover für Epoxyspachtel zu vermeiden - Bei der täglichen Wartung sollten vorzugsweise Wasser, neutrale Reinigungsmittel und ein weicher Schwamm verwendet werden; auf Alkohol, säure- oder basenhaltige Mittel sowie Reinigungsmittel, die Schleifpasta enthalten, sollte verzichtet werden - Zum Reinigen von Ölflecken können spezifische, in allen Supermärkten erhältliche kommerzielle Entfetter verwendet werden - Von der Verwendung von Produkten auf der Basis von Essigsäuresilikon zum Abdichtung von Fenstern, Duschen oder Sanitärreinigungen auf der Keramikoberfläche wird abgeraten; alternativ hierzu sollten neutrale, also säure- und basenfreie Produkte verwendet werden. Decken Sie die Platte immer mit einem Klebeband vor deren Abdichtung ab.

Los artículos **09/10/11/12/13/14** de Neutra 6.0 presentan coloraciones únicas e irrepitibles, con los tradicionales sistemas de cocción del sector de la cerámica. Estas coloraciones aúnan la cualidad estética de los cromatismos propuestos con un proceso productivo completamente artesanal, en el que sus matices y ligeras variaciones cromáticas deben considerarse características únicas del producto. Para exaltar estas características en el uso del día a día del material, les pedimos que: - Utilicen estos artículos solamente para revestir paredes interiores. - Protejan antes del enmasillado los bordes de las baldosas con la correspondiente cinta protectora engomada y que la quiten antes de que se sequen del todo los residuos de masilla o silicona que pudieran haber quedado. - En caso de que entren en contacto con las baldosas residuos de masilla epóxica o silicona, quitenlos inmediatamente con agua caliente y una esponja suave, evitando de todos modos el uso de ácidos o quitamanchas en masillas epóxicas. - En el mantenimiento cotidiano, utilicen preferiblemente agua, jabones neutros y una esponja suave, evitando alcohol, detergentes ácidos o básicos y detergentes a base de pasta abrasiva. - Para quitar las manchas de aceite pueden utilizarse productos desengrasantes específicos que se encuentran en venta en cualquier supermercado. - Se desaconseja el uso de productos a base de silicona acética para sellar la carpintería, las duchas o los sanitarios en la superficie cerámica; como alternativa, utilicen productos neutros y cubran siempre la baldosa con cinta protectora antes de proceder al sellado.

Артикулы **09/10/11/12/13/14** серии Neutra 6.0 имеют уникальные цвета, которые нельзя воспроизвести с применением традиционных систем обжига, используемых в керамической промышленности. Эстетическое качество предложенной палитры цветов обеспечивается полностью ремесленным производственным процессом, поэтому, оттенки и легкие цветовые изменения должны считаться признаком уникальности продукта. Для подчеркивания этих характеристик, при ежедневном использовании материала необходимо: - Применять эти артикулы лишь только для облицовки внутренних стен. - Перед заполнением швов защитить края плит защитной липкой лентой, которую следует удалить до полного высыхания остатков затирки или силиконового герметика. - В случае попадания остатков эпоксидной затирки или силиконового герметика на плиты немедленно удалить их теплой водой и мягкой губкой, ни в коем случае не используя кислоты или растворители для эпоксидных затирок. - Для ежедневного ухода желательно использовать воду, нейтральные моющие средства и мягкую губку, не допускается использование спирта, кислотных или щелочных моющих средств, а также чистящих средств на основе абразивной пасты. - Для удаления пятен масла можно использовать специальные обезжиривающие средства, продающиеся во всех супермаркетах. - На керамической поверхности не следует использовать продукты на основе уксусного силиконового герметика, предназначенного для герметизации рам, душей и сантехники; вместо них используйте нейтральные средства, и в любом случае перед заполнением швов защитите плитку липкой лентой.
